# Hardy American Plants

The Largest Nursery-Grown Stock  
of Native Plants in America

---

## HARLAN P. KELSEY

CABLE ADDRESS, "KELMONT, BOSTON"

1123 Tremont Building

BOSTON, MASS.

---

### NOTICE—CHANGE OF ADDRESS

Mr. Harlan P. Kelsey begs to announce that he has removed the office of Highlands Nursery from Kawana, North Carolina, to 1123 TREMONT BUILDING, BOSTON, MASS., where he has enlarged facilities for serving his clients, and requests that all correspondence in future be sent to the new address.

# ...Customers Carefully Note...

**Stock will be shipped direct from Highlands Nursery**, Kawana, in the mountains of western North Carolina.

## **Shipping station, Cranberry, N. C.**

**An exchange** of Catalogs, Botanical Lists, etc., is desired.

**Shipments** extend over the world, and the packing is as nearly perfect as possible. Large frost-proof Cellar, Packing House and Sheds facilitate prompt shipments. Packing charged at cost.

**Foreign remittances** should be sent by International Postal Money Order, drawn on Boston, Mass., or by New York or Boston Exchange.

**Claims** must be made immediately on receipt of goods.

**All shipments** travel at consignee's risk. Shipping usually begins about October 1, and lasts until December.

## **Please note great reduction in prices.**

**As heretofore**, a specialty will be made of growing and collecting Rhododendrons, Azaleas, Kalmias, Hemlocks, and plants of this class, in wholesale quantities. The leading parks, cemeteries and nurseries of America have been satisfactorily supplied in the past with hundreds of thousands of plants from Highlands Nursery.

Mr Kelsey is well known as the introducer and supplier of the universally used and popular decorative greens, **CALAX LEAVES** and **LEUCOTHOË SPRAYS**, of which the florist trade in this country and Europe consumes many millions annually, and contracts for any quantity can be executed promptly.

## **SPECIAL NOTICE.**

**COLLECTING.**—Nearly all the plants offered in this list are **heavy, nursery-grown**, but can be supplied at exceptionally low figures in best "collected stock." **Rhododendrons, Kalmias, Leucothoe catesbaei, Galax aphylla**, and other evergreen shrubs and ground-covering plants are collected by the car-load, for use in producing **special effects** by massing in large grounds and parks, and are now used very extensively.

My facilities are unapproached anywhere for collecting the best stock at a low cost, and an experience of 13 years and well-trained collectors enable me to assure buyers that orders for "collected" plants will receive the same attention and care as though I intended planting the stock myself.

**Write for special information and prices on "COLLECTED STOCK."**

Address

**HARLAN P. KELSEY,**

I have very exceptional facilities for collecting the finest seedlings of Hemlock from 3 inches to 2 feet in height, at a remarkably low figure. Nurserymen can hardly stock up too heavily on Hemlocks, as they constantly increase in value in the nursery row, and there is almost unlimited demand for them in large sizes at good prices. WRITE FOR VERY SPECIAL ESTIMATE ON 50,000 to 100,000 LOTS, COLLECTED TO ORDER.

Please note the enormous stock of young **KALMIA LATIFOLIA** and **RHODODENDRONS** offered in this list. All are carefully transplanted and cultivated, and are clean and stocky. I have special methods of growing, gained by long experience, which ensures healthy, well-ripened growth, and good balls on roots, and the large quantities grown enable me to produce and sell at extraordinary LOW PRICES.

The above are also COLLECTED TO ORDER CHEAPLY in any quantities.
